BID SPECIFICATIONS AND INSTRUCTIONS FOR REINFORCED CONCRETE CULVERT PIPE (CONT.)

All sales of concrete culvert pipe must meet the South Carolina Department of Transportation's Standard Specification for Highway Construction Edition of 2007; Section 714. Section 714 refers to SC-M-714 Supplemental Technical Specification for Permanent Pipe Culverts. **These specifications are located on the SCDOT Internet, Doing Business with SCDOT, Supplemental Technical Specifications:** http://www.scdot.org/doing/sup_tech_specs.shtml

The SC-M-714 Supplemental Technical Specification for Permanent Pipe Culverts are subject to frequent changes and the contractor must meet the SC-M-714 requirements that are in place at the time of contract award. After award, the Contractor is responsible for checking the SCDOT Internet to ensure that pipe meets the most current requirements of SC-M-714 that are in effect at the time of delivery.

All unit prices on each District Schedule are net price per 8 foot length, which represent prices for which awarded vendors will furnish the several sizes of the pipe, meeting the required specifications, delivered to any destination in the respective counties, named in the bid schedule, by highway transport trucks to the job sites as directed.

Pipe is to be purchased in 8-foot lengths for all sizes for all counties.

DELIVERY/PERFORMANCE LOCATION -- PURCHASE ORDER (JAN 2006)

After award, all deliveries shall be made and all services provided to the location specified by the Using Governmental Unit in its purchase order. [03-3015-1]

DELIVERY DATE -- 7 to 15 DAYS ARO

Unless otherwise specified herein, all items shall be delivered no later than seven to fifteen days after contractor's receipt of the purchase order. Required delivery for all 8 foot pipe (all diameters) is a maximum of (15) days ARO. The contractor shall ship these orders prepaid, add the shipping charges to the invoice as a separate item and include in the invoice total for payment by the ordering agency. SCDOT and all other ordering agencies also have the option of making their own pickup and delivery from the vendor/contractor's lot, thus saving payment for the shipping charges.

All pipe dimensions have a set minimum class of Class III with the exception of 18" RCP. The set minimum class for 18" RCP is to be Class IV.

Straight exterior wall of pipe is required with no protruding bell for Districts 1,2,3,4,5, and 7. (B) Exterior wall of pipe with or without protruding bell for Districts 6 & 8
